Publishing, Subscription, and Advertising Offices: Pergamon Press Inc., Fairview Park, Elmsford, NY 10523, U.S.A., or Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England.

Published Eighteen Per Annum (Three Volumes 1989). From 1990, twenty-four issues will be published per annum, in four volumes.

annual subscription rates (1990)
Annual institutional subscription rate (1990) DM 3185.00.
Two-year institutional rate (1990/1991) DM 6051.50.
Personal subscription rate for those whose library subscribes at the regular rate (1990) DM 290.00.
Prices are subject to change without notice.

Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Pergamon Press offices.

LIST OF CONTENTS

NUMBER 1

	i	Announcement
Y. Feng	1	A method for computing structural system reliability with high accuracy
C. W. Park, Y. M. Yoo and K. H. Kwon	7	Shape design sensitivity analysis of an axisymmetric turbine disk using the boundary element method
T. Belytschko, H. S. Chang and Y. Y. Lu	17	A variationally coupled finite element–boundary element method
P. G. Duxbury, M. A. Crisfield and G. W. Hunt	21	Benchtests for geometric nonlinearity
J.-P. Jeusette and V. Sonzogni	31	A projected conjugate gradient method for structural stability analysis with linear constraints
W. C. Hwang and C. T. Sun	41	Failure analysis of laminated composites by using iterative three-dimensional finite element method
S. Vijayakar, H. Busby and L. Wilcox	49	Finite element analysis of three-dimensional conformal contact with friction
D. Bagchi, N. F. Grace and J. B. Kennedy	63	Dynamic response of thick plates and shells
C. W. S. To	73	An implicit direct integrator for random response of multi-degree-of-freedom systems
I. Carol and J. Murcia	79	Nonlinear time-dependent analysis of planar frames using an 'exact' formulation—I. Theory
I. Carol and J. Murcia	89	Nonlinear time-dependent analysis of planar frames using an 'exact' formulation—II. Computer implementation for R.C. structures and examples
A. E. Anuta, Jr	103	The mode shape reversal
J. L. Chen and P. Hajela	117	A rule based approach to optimum design modeling
S. K. Ider and F. M. L. Amirouche	129	Numerical stability of the constraints near singular positions in the dynamics of multibody systems
J. Petrolito and B. W. Golley	139	Macro element analysis of composite beam–slab systems
J. S. Strenkowski and R. D. Ciskowski	149	Use of the Fast Fourier Transform to improve direct numerical integration schemes for transient structural response

J. A. Kołodziej and M. Kleiber	155	Boundary collocation method vs FEM for some harmonic 2-D problems
D. Briassoulis	169	On the basics of the shear locking problem of C^0 isoparametric plate elements
E. N. Dvorkin, D. Celentano, A. Cuitiño and G. Gioia	187	A Vlasov beam element
Z.-H. Zhong and L. Nilsson	197	A contact searching algorithm for general contact problems
S. Itou and S. Outake	211	Stresses around cervical vertebrae
G. Bolzon and R. Vitaliani	221	Derivation of hyperelastic incompressible material constitutive tensor within a total Lagrangian framework
L. Mentrasti	229	On a singular system of differential equations arising in variational methods
M. A. B. Widing and M. H. Moeinzadeh	233	Nonlinear finite element analysis of a frame stiffened with tension members
R. El Abdi and G. Valentin	241	Isoparametric elements for a crack normal to the interface between two bonded layers
K. H. Ha and M. Desbois	249	Finite elements for tall building analysis
I. E. Harik and M. G. Andrade	257	Stability of plates with step variation in thickness
S. N. Patnaik	265	Analytical initial design for structural optimization via the integrated force method
P. Parreira and M. Guiggiani	269	On the implementation of the Galerkin approach in the boundary element method
T. S. Balasubramanian and G. Prathap	281	A field consistent higher-order curved beam element for static and dynamic analysis of stepped arches
M. S. Cheung, S. F. Ng and Z. Bingzhang	289	Finite strip analysis of beams and plates with material nonlinearity
A. Bhimaraddi, A. J. Carr and P. J. Moss	295	Finite element analysis of laminated shells of revolution with laminated stiffeners
A. A. Shabana and C. W. Chang	307	Connection forces in deformable multibody dynamics
	I	Software Survey Section

NUMBER 2

	i	Announcement
C. I. Bajer	319	Adaptive mesh in dynamic problems by the space–time approach
H. C. Huang	327	Elastic and elasto-plastic analysis of shell structures using the assumed strain elements
L. Yang and Z. K. Ma	337	A method of reliability analysis and enumeration of significant failure modes for a composite structural system
S. Chandra and G. Prathap	345	A field-consistent formulation for the eight-noded solid finite element
C. M. Anekwe	357	Reduction of arithmetic operation in member stiffness matrix transformation
A. N. Palazotto and J. G. Mercer	363	Finite element elastic–plastic analysis of cracks
L. M. C. Simões	375	Isolated global optimality in truss sizing problems
J. K. Chen, D. W. Tu and H. Chin	385	Elastic–plastic analysis of interlaminar stresses in composite laminates due to bending and torsion
A. Poceski	395	A variational approach in the finite element method
V. Ramamurti and N. C. Narayanan	403	Dynamic stress analysis of roller clutch sleeve
S. W. Sloan and W. S. Ng	411	A direct comparison of three algorithms for reducing profile and wavefront
R. Levy	421	Linear programming in prestressed trusses
I.-W. Liu and C.-C. Lin	427	A refined optimality criterion technique applied to aircraft wing structural design
K. Chandrashekhara	435	Free vibrations of anisotropic laminated doubly curved shells
C. W. Springfield, Jr and A. D. Joshi	441	Interfacial friction effects on the mechanics of stacked beams
C. W. Springfield, Jr and R. M. Brunair	453	End-fixity determination of vibrating structural components
Lu Xian, Lin Jiahao and Zhong Wanxie	459	Subspace iteration method in multi-level substructure systems

S. H. Lee	463	Rudimentary considerations for effective quasi-Newton updates in nonlinear finite element analysis
K. K. Raju and **G. Venkateswara Rao**	477	Stability of moderately thick annular plates subjected to a uniform radial compressive load at the outer edge
R. D. Cook	483	Axisymmetric finite element analysis for pure moment loading of curved beams and pipe bends
C.-H. Sheu, G. De Roeck, M. Van Laethem and **P. Geyskens**	489	Multi-level substructuring and an experimental self-adaptive Newton–Raphson method for two-dimensional nonlinear analysis
R. C. Kar and **S. Neogy**	499	Stability of a rotating, pre-twisted non-uniform cantilever beam with tip mass and thermal gradient subjected to a non-conservative force
N. J. Salamon	509	Receding/advancing contact of structural elements simplified
A. Chulya and **R. L. Mullen**	513	Assumed strain distributions for a finite strip plate bending element using Mindlin–Reissner plate theory
A. Ibrahimbegovic and **E. L. Wilson**	523	Simple numerical algorithms for the mode superposition analysis of linear structural systems with non-proportional damping
T.-C. Chen and **C.-I. Weng**	533	Coupled transient thermoelastic response in an axisymmetric circular cylinder by Laplace transform–finite element method
R. J. Gu	543	Moving finite element analysis for two-dimensional frictionless contact problems
S. Y. Lee and **W. J. Yen**	551	Hygrothermal effects on the stability of a cylindrical composite shell panel
K.-J. Lin, P.-J. Lu and **J.-Q. Tarn**	561	Flutter analysis of composite panels using high-precision finite elements
G. Gajer and **P. F. Dux**	575	Strain-softening analysis of concrete structures
H. L. Soriano and **J. W. Haas**	583	Matrix compatibility of interface between thin-walled open-section column and beam
K. Y. Lam, S. T. Chow and **K. M. Liew**	593	Finite element–holography–influence coefficient based method for more accurate vibration studies
C. C. Baniotopoulos	601	Optimal control of submarine cables in unilateral contact with the sea-bed profile

L. G. Zhang and T. X. Yu 609 Modified adaptive dynamic relaxation method and its application to elastic–plastic bending and wrinkling of circular plates

I Software Survey Section

NUMBER 3

i Announcement

F. Gordaninejad 615 Nonlinear bending of anisotropic bimodular composite-material plates

P. M. Pinsky and N. N. Abboud 621 Two mixed variational principles for exterior fluid–structure interaction problems

M. N. Raftenberg 637 Response of steel disks to explosive loading

C.-K. Choi and H.-W. Lee 655 Oscillation problem in element optimization with discrete sections and control

I. M. May and I. A. S. Al-Shaarbaf 667 Elasto-plastic analysis of torsion using a three-dimensional finite element model

L. Olson and T. Vandini 679 Eigenproblems from finite element analysis of fluid–structure interactions

K. S. Surana and N. J. Orth 689 Axisymmetric shell elements for heat conduction with p-approximation in the thickness direction

T. Belytschko and D. Lasry 707 A study of localization limiters for strain-softening in statics and dynamics

B. Ghosh and J. N. Bandyopadhyay 717 Bending analysis of conoidal shells using curved quadratic isoparametric element

N. Siva Prasad and K. V. R. Vardhani 729 Computer aided development of surfaces for intersecting cylinders and cones

J. Milton de Araújo 735 Optimization of Newton–Raphson methods in RC nonlinear analysis

D. Duke and J. L. Hill 743 Load transfer in skip welded stiffened panels

T. Kant and B. S. Manjunath 755 Refined theories for composite and sandwich beams with C^0 finite elements

C.-K. Chen and J.-M. Chen 765 Transient heat conduction in an infinitely long hollow cylinder composed of three different materials

C.-K. Chen, K.-L. Wong and M.-S. Lee	771	Finite element solution of time-dependent flow and heat-transfer characteristics around a circular cylinder
A. K. Aditya and J. N. Bandyopadhyay	781	Simplified bending analysis of doubly curved shells
M. M. ElMadany and Z. Abduljabbar	785	On the statistical performance of active and semi-active car suspension systems
W. J. Lewis	791	The efficiency of numerical methods for the analysis of prestressed nets and pin-jointed frame structures
A. Cardona and M. Geradin	801	Time integration of the equations of motion in mechanism analysis
C. W. Wong and S. L. Lau	821	Simplified finite element analysis of three-dimensional tall building structures
R. S. Srinivasan and P. A. Krishnan	831	Dynamic analysis of stiffened conical shell panels
D. P. Thambiratnam and N. Krishnamurthy	839	Computer analysis of column base plates
W. Ostachowicz	851	Forced vibrations of a beam including dry friction dampers
E. G. Ladopoulos	859	Singular integral operators method for two-dimensional plasticity problems
N. Miyazaki, T. Ikeda and T. Munakata	867	Analysis of stress intensity factor using the energy method combined with the boundary element method
O. T. Iancu	873	Non-singular wedge combinations at the free edge of a brazed ceramic–metal joint
C. T. Sun and W. J. Liou	879	Investigation of laminated composite plates under impact dynamic loading using a three-dimensional hybrid stress finite element method
		Compendium Paper
M. J. Kaldjian	885	Interactive preprocessors for SAP IV, NASTRAN, and ADINA in the teaching environment
		Technical Notes
C. Li	897	PRETAP: an expert preprocessor for a structural analysis program of tall buildings
M. Hoit and J. H. Garcelon	903	Updated profile front minimization algorithm
	I	Software Survey Section

NUMBER 4

	i	Announcement
E. Altus	915	A global–local interactive method for fast convergency of iterative finite difference solution of PDE
S. Qaqish	923	Comparison between linear and nonlinear structural analysis and the use of very small increments in solving nonlinear structural analysis
T. K. Paul and **K. M. Rao**	929	Stress analysis around circular holes in FRP laminates under transverse load
T. D. Hien and **M. Kleiber**	939	Computational aspects in structural design sensitivity analysis for statics and dynamics
A. Shirazi-Adl	951	An interface continuous stress penalty formulation for the finite element analysis of composite media
V. K. Arya	957	Analytical and finite element solutions of some problems using a viscoplastic model
K. J. Berry	969	Parametric 3D finite-element mesh generation
M. E. M. El-Sayed	977	Calculation of joint spring rates using finite element formulation
R. C. Kar and **S. Neogy**	983	An iterative approach based on generalized adjointness to certain non-conservative stability problems
H. V. Lakshminarayana and **K. Kailash**	987	A shear deformable curved shell element of quadrilateral shape
R. Paskaramoorthy, W. M. Karunasena, A. H. Shah and **S. K. Datta**	1003	On the performance of plate-bending elements for wave propagation problems
S. F. Ng and **N. Bencharif**	1011	A finite difference computer program for the modelling of thick rectangular plates
J. Rismantab-Sany and **A. A. Shabana**	1017	On the numerical solution of differential/algebraic equations of motion of deformable mechanical systems with nonholonomic constraints
M. S. Cheung and **W. Li**	1031	A modified finite strip method for geometrically nonlinear analysis of plates
M. O. Al-Hunaidi	1037	Analysis of wave propagation in unbounded media
Y. Ohtani and **W.-F. Chen**	1047	A plastic-softening model for concrete materials

K.-M. Hsiao and **J.-Y. Jang**	1057	Nonlinear dynamic analysis of elastic frames
S. C. Sinha, V. Prakash, P. B. Ravikumar and **R. Raman**	1065	Modeling and simulation of cargo containers
J. D. Whitcomb	1073	Vector algorithms for geometrically nonlinear 3D finite element analysis
C. G. Nandakumar and **K. Rajagopalan**	1085	A bar finite element analogy for Echinodome shells
R. J. Yang	1089	Shape design sensitivity analysis with frequency response
B. P. Naganarayana and **G. Prathap**	1095	Displacement and stress predictions from field- and line-consistent versions of the eight-node Mindlin plate element
B. P. Naganarayana and **G. Prathap**	1107	Force and moment corrections for the warped four-node quadrilateral plane shell element
X. Liu, Q. Wang and **W. F. Chen**	1117	Layered analysis with generalized failure criterion
	I	Software Survey Section

NUMBER 5

	i	Announcement
C. H. Tseng and **K. Y. Kao**	1125	Performance of a hybrid sensitivity analysis in structural design problems
M. K. Huang and **J. Wu**	1133	On the problem of free torsional vibration of variable diameter circular shafts by the boundary integral equation method
T. S. Zheng, W. M. Liu and **Z. B. Cai**	1139	A generalized inverse iteration method for solution of quadratic eigenvalue problems in structural dynamic analysis
C. S. Putcha and **H. A. Al-Khaiat**	1145	Safety analysis of beams on elastic foundations using initial value method
M. H. Luah and **S. C. Fan**	1153	General free vibration analysis of shells of revolution using the spline finite element method
G. Chandrasekharappa and **H. R. Srirangarajan**	1163	Nonlinear dynamic damped response of an orthotropic circular plate

M. A. M. Torkamani and O. Y. H. Elsafi 1167 A unified approach to the solution of plane elasto-plastic problems: criteria of yielding

D. C. Salmon and J. F. Abel 1183 Assessing the effect of shape distortion in Q9 membrane elements

T. Kant and **M. P. Menon** 1191 Higher-order theories for composite and sandwich cylindrical shells with C^0 finite element

L. S. Chen and **H. S. Chu** 1205 Transient thermal stresses of a composite hollow cylinder heated by a moving line source

M. G. Kittur, R. L. Huston and F. B. Oswald 1215 Improvement of finite element meshes: heat transfer in an infinite cylinder

V. V. Kobelev 1223 Numerical method for shape optimization using BEM

A. E. Anuta, Jr 1229 The compatibility of the modal equations

F. Espiga, L. Gracia and M. Doblare 1233 Shape optimization of elastic homogeneous 2D bodies by the boundary element method

T. Jia and F. M. L. Amirouche 1243 Optimum impact force in motion control of multibody systems subjected to intermittent constraints

K. S. Surana and N. J. Orth 1251 p-Approximation axisymmetric shell elements for heat conduction in laminated composites

D. Fritzson 1267 A three-dimensional finite strain constitutive theory for elastomer composites

E. Reissner 1289 Lateral buckling of beams

T. Belytschko, B. L. Wong and E. J. Plaskacz 1307 Fission–fusion adaptivity in finite elements for non-linear dynamics of shells

Technical Notes

C. J. Brown 1325 Elastic stability of plates subjected to concentrated loads

K. Kanaka Raju, G. Venkateswara Rao and N. Venugopal 1329 Use of design sensitivity coefficients for prediction of structural behaviour after design modification

I Software Survey Section

NUMBER 6

	i	Announcement
L.-W. Chen and **D.-M. Ku**	1333	Dynamic stability analysis of a composite material planar mechanism by the finite element method
J. F. Dwyer	1343	Functional programming for finite elements
S. Swaddiwudhipong, C. M. Wang, K. M. Liew and **S. L. Lee**	1349	Optimal pretensioned forces for cable networks
Y. Ding	1355	Optimum design of honeycomb sandwich constructions with buckling constraints
L. F. Zeng and **N.-E. Wiberg**	1365	A generalized coordinate method for the analysis of 3D tall buildings
M. R. Taheri and **E. C. Ting**	1379	Dynamic response of plate to moving loads: structural impedance method
E. Sandgren	1395	Structural design optimization for latitude by nonlinear goal programming
T. Nakamura and **M. Ohsaki**	1403	Sequential generator of earthquake-response constrained trusses for design strain ranges
S. A. Al-Kaabi and **G. Aksu**	1417	Free vibration analysis of Mindlin plates with parabolically varying thickness
M. A. Ajiz	1423	Partial diagonalization using Jacobi transformation for dynamic analysis
H. Al-Khaiat	1431	Free vibration analysis of orthotropic plates by the initial value method
A. Benedetti and **A. Tralli**	1437	A new hybrid F.E. model for arbitrarily curved beam—I. Linear analysis
W.-H. Chen and **C.-S. Chang**	1451	Analysis of two-dimensional mixed-mode crack problems by finite element alternating method
O. Bruhns and **A. Służalec**	1459	Thermal effects in thermoplastic metal with internal variables
H. Karandikar, R. Srinivasan, F. Mistree and **W. J. Fuchs**	1465	Compromise: an effective approach for the design of pressure vessels using composite materials

Y. Ding, J. Yu and **B. Xiong** 1479 Optimum design of structures composed of metal and composite materials

S. Tamimi, B. Amadei and **D. M. Frangopol** 1495 Monte Carlo simulation of rock slope reliability

Compendium Paper

T.-S. Yang and **Y.-B. Chang** 1507 Array Management System (AMS)
